Research Session 1
Enhancing Claim-Based Identity Management by Adding a Credibility Level to the Notion of Claims ............... XXX
_ Ivonne Thomas, Christoph Meinel_
A Security Meta-Model for Service-oriented Architectures ................................................................................... XXX
_ Michael Menzel, Christoph Meinel_
Effective Detection of SQL/XPath Injection Vulnerabilities in Web Services....................................................... XXX
_ Nuno Antunes, Nuno Laranjeiro, Marco Vieira, Henrique Madeira_

Research Session 2
Integrated Constraint Violation Handling for Dynamic Service Composition ....................................................... XXX
_ Mingxue Wang, Kosala Yapa Bandara, Claus Pahl_
Optimal Replacement Policy of Services based on Markov Decision Process ....................................................... XXX
_ Sandhya Pillai, C. Nanjangud Narendra_
A Model to Design and Verify Context-Aware Adaptive Service Composition XXX
_ Javier Cubo, Michele Sama, Franco Raimondi, David Rosenblum_

Research Session 3
Towards Autonomic Service Discovery - A Survey and Comparison................................................................. XXX
_ Michael Rambold, Holger Kasinger, Florian Lautenbacher, Bernhard Bauer_
Identifying Client Goals for Web Service Discovery ............................................................................................... XXX
_ Eyhab Al-Masri, Qusay Mahmoud_
Web Service Substitution based on Preferences over Non-functional Attributes .................................................. XXX
_ Ganesh Ram Santhanam, Samik Basu, Vasant Honavar_

Research Session 4
Analyzing Impact Factors on Composite Services ............................................................................................... XXX
_ Lianne Bodenstaff, Andreas Wombacher, Manfred Reichert, Michael C. Jaeger_
Model Aware Execution of Composite Web Services ............................................................................................ XXX
_ Karolina Zurowska, Ralph Deters_
QoS Analysis for Web Service Composition ........................................................................................................... XXX
_ Huiyuan Zheng, Weiliang Zhao, Jian Yang, Athman Bouguettaya_

Research Session 5
A Holistic View of Industry Standards across SOA Solution Stack ..................................................................... XXX
_ Nir Mashkif, Natalia Razinkov, David Amid, Amit Fisher_
Managing Configuration Complexity during Deployment and Maintenance of SOA Solutions ............................. XXX
_ Kalapriya Kannan, Nanjangud C. Narendra, Lakshmith Ramaswamy_
Evaluating Service Identification with Design Metrics on Business Process Decomposition ............................ XXX
_ Qian Ma, Nianjun Zhou, Yanfeng Zhu, Hao Wang_

Research Session 6
Alignment of Choreography Changes in BPEL Processes ................................................................................... XXX
_ Andreas Wombacher_
Automatically Deriving Choreography-Conforming Systems of Services .......................................................... XXX
_ Gregorio Diaz, Ismael Rodriguez_
QoS-Enabled Business-to-Business Integration Using ebBP to WS-BPEL Translations .......................................... XXX
_ Andreas Schonberger, Thomas Benker, Stefan Fritzemeier, Matthias Geiger, Simon Harrer, Tristan Kessner, Johannes Schwalb, Guido Wirtz_

Research Session 7
Organizing Documented Processes .................................................................................................................. XXX
Biplav Srivastava, Debdoot Mukherjee

Change Propagation in Process Models using Behavioural Profiles ................................................................. XXX
Matthias Weidlich, Mathias Weske, Jan Mendling

A Task Abstraction and Mapping Approach to the Shimming Problem in Scientific Workflows ..................... XXX
Cui Lin, Shiyong Lu, Xubo Fei, Darshan Pai, Jing Hua

Research Session 8
Spatio-Temporal Patterns for Problem Determination in IT Services .................................................................... XXX
Shubhadip Mitra, Partha Dutta, Shivkumar Kalyanaraman, Prashant Pradhan

Multi-dimensional Knowledge Integration for Efficient Incident Management in a Services Cloud ......................... XXX
Rajeev Gupta, Hima Karanam, Laura Luan, Daniela Rosa, Chris Ward

Managing Faults in the Service Delivery Process of Service Provider Coalition ................................................... XXX
Patricia Marcu, Larisa Shwartz, Genady Grabarnik, David Loewenstein

Research Session 9
SolutionFinder: Intelligent Knowledge Integration and Dissemination for Solution Retrieval in IT Support Services XXX
Huajing Li, Maja Vukovic, Gopal Pingali, Wang-Chien Lee

Protecting Sensitive Customer Information in Call Center Recordings ................................................................... XXX
Tanveer Faruque, Sumit Negi, L V Subramaniam

Dependency Analysis Framework for Software Service Delivery ........................................................................ XXX
Rema Ananthanarayanan, Vijil Chenthamarakshan, Heng Chu, Deshpande Prasad, Raghu Krishnapuram, Shajeer Mohammed

Research Session 10
Efficient Seat Utilization in Global IT Delivery Service Systems .......................................................................... XXX
Pranav Gupta, Gyana Parija

Effective Decision Support For Workforce Deployment Service Systems ........................................................... XXX
Kashyap Dixit, Munish Goyal, Pranav Gupta, Nanda Kambhatla, Rohit Lotlikar, Debapriyo Majumdar, Gyana Parija, Sambuddha Roy, Soujanya Soni

An Optimal Capacity Planning Algorithm for Provisioning Cluster-Based Failure-Resilient Composite Services XXX
Chun Zhang, Rong N. Chang, Charles Perng, Edward So, Chunqiang Tang, Tao Tao

Research Session 11
Performance Management for Large Scale Service Delivery Platforms .......................................................... XXX
Manoj Agarwal

ITBVM: IT Business Value Modeler ....................................................................................................................... XXX
Nikolai Joukov, Birgit Pfitzmann, HariGovind RamaSamy, Norbert Vogl, Murthy Devarakonda, Tryg Ager

Towards Providing Value Based Differentiated QoS .......................................................................................... XXX
Girish Chafle, Sameep Mehta, Gyana Parija

Research Session 12
Reconfigurable SCA Applications with the FraSCAti Platform ........................................................................... XXX
Lionel Seinturier, Philippe Merle, Damien Fourmier, Nicolas Dolet, Valerio Schiavoni, Jean-Bernard Stefani

Change Propagation in Process Models using Behavioural Profiles ................................................................. XXX
Matthias Weidlich, Mathias Weske, Jan Mendling

Ontology-based Information Sharing in Service-Oriented Database Systems ................................................... XXX
TszYan Chow, Wei-Tek Tsai, Janaka Balasooriya, Xiaoying Bai

Application and Industry Track

Application and Industry Session 1
Interaction Mismatch Discovery based Transformation from BPMN to BPEL .................................................. XXX
Shuai Gong, Jinhua Xiong

Extracting Behavioral Models from WS-BPEL Processes for Service Discovery .................................................. XXX
Xiao Zan, Donggang Cao, Chao You, Minghui Zhou, Hong Mei
Improving the Performance of ActiveXML Workflows: The Formal Descriptions
Sattanathan Subramanian, Guttorm Sindre

Application and Industry Session 2
A Service Oriented Architecture for Personalized Rich Media Delivery
Sascha Toennies, Benjamin Köhnecke, Patrick Hennig, Wolf-Tilo Balke
WS-CDSP: A Novel Web Services-based Content Delivery Service Peering Scheme
Lu ZhiHui, Jie Wu, Chuan XIAO, WeiMing Fu, YiPing Zhong
Ensuring Coordination of Multi-business Interactions
Min Yuan, Zhiqiu Huang

Application and Industry Session 3
Componentization of Business Process Layer in the SOA Reference Architecture
Liang-Jie Zhang, Jia Zhang
Web2Exchange: A Model-Based Service Transformation and Integration Environment
Venugopal Srinivasasmurthy, Sanjeeva Manvi, Sharad Singhal, Jim Pruyne, Ravi Gallapalli, Dattathreya Sathymurthy, Nandan Reddy, Hemanth Dattatreya
Towards a Unified Approach for Business Process Modeling Using Context-based Artifacts and Web Services
Nanjangud Narendra, Youakim Badr, Philippe Thiran, Zakaria Maamar

Application and Industry Session 4
Identifying Data Constrained Activities for Migration Planning
Linh Lam, Qin Tang, Zhi Le Zou, Liana Fong, David Frank
Cost-Effective Semantic Annotation of XML Schemas and Web Service Interfaces
Peep Kingas, Marlon Dumas
Clustering Web Services for Automatic Categorization
Althea Liang, Li Peipei, Patrick C.K. Hung, Xindong Wu

Application and Industry Session 5
Quantitative Modeling of Communication Cost for Global Service Delivery
Nianjun Zhou, Qian Ma, Krishna Ratakonda
Simplify Stochastic QoS Admission Test for Composite Services through Lower Bound Approximation
Kaibo Wang, Shandan Zhou
Port Based Reliability Computing for Service Composition
Zuohua Ding, Mingyue Jiang

Application and Industry Session 6
Dynamic Service Composition in Ambient Intelligence Environment
Yazid Benazzouz, Nicolas Sabouret, Belkacem Chikhaoui
A Backwards Composition Context Based Service Selection Approach for Service Composition
Hong Qing Yu, Stephan Reiff-Marganiec
A Public-View Approach to Timed Properties Verification for B2B Web Service Compositions
Wei Song, Xiaoxing Ma, S.C. Cheung, Wanchun Dou, Jian Lv

Application and Industry Session 7
A Model for Designing Generic Services
Anshu Jain, Alan Hartman, Ketki Dhanesha
Design Pattern for Object-Triple Mapping
Matthias Quasthoff, Christoph Meinel
Constructing a Context-aware Service-Oriented Reputation Model using Attention Allocation Points
Rehab Alnemr, Justus Bross, Christoph Meinel

Application and Industry Session 8
A Case Study on Bi-lateral Resource Integration Oriented Marine Logistics Service System
Zhongjie Wang, Xiaofei Xu, Dianhui Chu, Chao Ma
Business Entities: An SOA Approach to Progressive Core Banking Renovation .................................................. XXX
  Rong Liu, Frederick Wu, Yasodhar Patnaik, Santhosh Kumaran
Design and Implementation of Secure Internet Based Voting System with User Anonymity using Identity Based
Encryption System.......................................................................................................................... XXX
  Purushothama B R, Alwyn R Pais

Work-in-Progress

Work-in-Progress Session 1
Trust Evaluation in Composite Services Selection and Discovery ............................................................. XXX
  Lei Li, Yan Wang
Service Composition based on Natural Language Requests ........................................................................... XXX
  Marcel Cremene, Jean-Yves Tigli, Stephane Lavriotte, Florin-Claudiu Pop, Michel Riveill, Gaetan Rey
Domain-Specific Deployment and Configuration Language for Composition and Adaptation of Coarse-Grained
Services ................................................................................................................................................. XXX
  Kurt Englmeier, Ricki Koinig
Ontology Alignment Based Service Interface Adaptation ............................................................................... XXX
  Lu Jin, Jian Wu, Jianwei Yin, Ying Li, Shuiguang Deng
Effective Knowledge Sharing in Service Systems ....................................................................................... XXX
  Waiho Wong, Joseph Davis

Work-in-Progress Session 2
An Information Model for Managing Service Lifecycle Resources ............................................................... XXX
  Roman Belter, André Ludwig
Service Innovation in Value-Network through Clusters Consolidation .......................................................... XXX
  Sami J. Habib, Paulvanna Nayaki Marinuthu
A Dynamic Compensation Mechanism for Web Transactions ....................................................................... XXX
  Jiajie Wu, Farong Zhong, Qiu Yufang
JabberWocky: Crowd-Sourcing Metadata for Files ..................................................................................... XXX
  Varun Bhagwan, Carlos Maltzahn
Cloud Security Issues ................................................................................................................................... XXX
  BalachandraReddy Kandukuri, RamaKrishna Paturi, Atanu Rakshit
GridSaaS: A Grid-enabled and SOA-based SaaS Application Platform ......................................................... XXX
  Yong Zhang, Shijun Liu

Work-in-Progress Session 3
Mobility Management for Seamless flow of Real Time Information in Heterogeneous Networks .................. XXX
  Adiline Macriga, P. Anandha Kumar
Agent with Rule Engine: The Glue for Web Service Oriented Computing applied to Network Management ...... XXX
  Mydhili Nair, Shishir Kakaraddi, Keerthi Ramanarayan, Gopalakrishna V
Context Aware Middleware Architecture for Wireless Sensor Network .......................................................... XXX
  Pankesh Patel, Sunil Jardosh, Sanjay chaudhary, Parabhat Ranjan
Towards an Agent-Based Simulation of Hospital Emergency Departments .................................................. XXX
  Hayden Stainsby, Manel Taboada, Emilio Luque
Ensuring Quality of Services at Runtime - A Case Study ................................................................................ XXX
  Claudia Raibulet, Marco Massarelli, Daniele Cammareri, Nicolo Perino
